Welcome

Welcome to Lincoln College University Centre

I am delighted that you are thinking about studying Higher Education at Lincoln College University Centre.

The extensive range of Higher Education courses are designed to support both your development of academic knowledge and the necessary industry skills needed to go on to successful employment. I am proud that the National Student Survey results (2023) were excellent, with students acknowledging that the course developed their knowledge and skills needed for the future.

Whether you are choosing to study full-time or part-time, you can be assured that you will be equipped with what you need from your chosen qualification. Working with employers, your course has been designed to ensure you are able to meet the demands required by industry and that content is aligned to prepare you for emerging developments in the sector.

Throughout your journey we recognise that there will be challenges and therefore we provide extensive support throughout your course with dedicated services and facilities, giving you every opportunity to achieve your qualification.

Understanding what students need is really important to us, which is why our flexible approach offers condensed timetables, this allows students to maintain regular part-time work or to manage caring responsibilities and family commitments.

Whether you are thinking about a change in career or those next steps, Lincoln College University Centre would be delighted to guide you through your journey, so if you have any questions, please do get in touch.

Melanie Watson
Assistant Principal Higher Education

Why Lincoln College University Centre?

A highly competitive job market across most sectors can make securing graduate roles challenging.

That's why we've developed Career Degrees, to give our students the opportunity to get ahead of the competition at interview and help them secure the career of their dreams.

Why choose us?

There are many reasons our students choose to study their degree with us, whether it is continuing from Further Education or coming back to study after a career change.

We've designed our Career Degrees to focus on preparing graduates for employment in their chosen sector or industry by supporting the development of both academic knowledge and vocational skills.

Our classes are smaller which means our students can receive more one-to-one time with their tutors, as well as engaging debates and collaborative working with fellow students.

With our condensed timetables, students may choose to work while studying, look after family or enjoy a better study-life balance.

We are keen to support our students with their studies which is why we offer various financial support packages. Please see our website for more information.

www.lincolncollege.ac.uk/financial-support-career-degrees

→ Graduate in the historic Lincoln Cathedral

→ Smaller lecture and tutor groups

→ Condensed timetables

→ Specialist team of professional Student Support Advisors

→ Friendly campuses at Lincoln, Newark and ASI

→ Dedicated support

Studying a degree at college gives students the same qualification as it would at a typical university.

The only difference between the two is the environment students study in!

Our Facilities

Our students have access to a wide range of facilities - from sports and leisure, to refectories, libraries and dedicated study spaces.

HE Common Room and Study Skills

Our Higher Education students have access to the HE Common Room in the newly-refurbished Gibney building. The common room offers a comfy seating area, WiFi and kitchen area with tea and coffee making facilities. We also have a dedicated HE Study Skills Centre located just outside with computer access for studying.

CHT Common Room

Students studying at our Christ's Hospital Terrace campus also have a dedicated common room to study, unwind and relax in. This also has a kitchen area with tea and coffee making facilities.

Newark Campuses Common Room

Students studying at our Newark campuses have a dedicated study room in the Newark Learning Zone.

At ASI, there is a designated HE common room. Tea and coffee making facilities are available at both campuses.

Refectories

The Lincoln College campus has two refectories, The CornerHouse and Deans café, offering a range of healthy and fast-food options.

Our Newark College campus is home to NG24 café which also offers freshly cooked food and confectionery items. and at ASI, we have the Launchpad café.

All these facilities are available at heavily discounted student rates.

Sessions Restaurant

Our historic fine-dining restaurant at Lincoln College is set in an old courtroom and jail, offering a unique dining experience. With a new barista and mixology suite, it is the perfect place to catch up or unwind.

Libraries

We are here to help! Our spacious and well-equipped libraries are designed to provide a safe, supportive and stimulating environment for independent study.

Students have access to computers and laptops to use within the library or can also use their own laptop or mobile device with WiFi hotspots available across campus. A designated space is available for HE students to study within the Lincoln and Newark Libraries.

Our Library pages can be found at lincolncollege-uk.libguides.com and provides students with all the information they need to support their studies.

To help students navigate the wide range of resources, our Library Information Advisers (LIA) offer group study skills focusing on digital capabilities, research, evaluating sources and referencing. Bookings can be made to see an LIA on a 1-2-1 basis for more in-depth support.

ALL THESE FACILITIES ARE AVAILABLE AT HEAVILY DISCOUNTED STUDENT RATES

Deans Sports & Leisure

Our Lincoln College campus has its own leisure complex with a purpose-built gym, physical performance lab, basketball courts and five-a-side football pitches. Free gym membership is available to all students (£10 joining fee applies).

Aura

Our students can enjoy a full range of beauty therapies and massages or visit our hair salon, Aura.

Escape Rooms

Lincoln College is now also home to Gamesaints Escape Rooms. Here students can play a variety of amazing games.

The Drill

The Drill is a live music and events venue situated in the heart of Lincoln city centre. In 2021, the Lincoln College Group took over the building to reopen as a not-for-profit venue hosting mainly live music gigs, comedy and other community events.

The venue features a main auditorium with a capacity of around 500, offering a flexible space for various events.

Additional facilities include meeting rooms, a modern café/bar and a restaurant called The Limelight.

The Old Bakery

The Old Bakery Restaurant in Lincoln's cathedral quarter is an award-winning eatery and guest house.

The Old Bakery is the only not-for-profit restaurant in the region. With no private owner or shareholders, every penny of profit goes back to our colleges in Lincoln and Newark to improve our education and training.

With rooms also available onsite, it's the perfect place for a getaway or to stay at graduation!

FREE STUDENT GYM MEMBERSHIP

***£10 Joining fee applies**

Support at College

We offer comprehensive and dedicated one-to-one support from enquiry to transition - from individual campus tours to support with the application process or student finance, we're here to support our students every step of the way.

We have a specialist team of professional Student Support Advisors who can offer guidance and support on a wide range of financial, personal and career-related issues.

Our Student Services team are here to help students with any questions or problems they have before, during and after their time at College.

Betty and Margot Therapy Dogs

Betty and Margot joined Lincoln College in 2023 and can be seen supporting students in the classroom, when they need some comfort in communal areas, and even during exams!

Bespoke Support

Lincoln College University Centre believes that all students should benefit from studying and learning, regardless of their background, and we endeavour to ensure that barriers students face are limited. We are committed to supporting all our students and wish to ensure that under-represented groups are able to study and achieve their best. We address areas for improvement through our Access and Participation Plan which can be found on the Lincoln College website.

Lincoln College University Centre offers lots of opportunities to enhance our students' studies including one-to-one sessions, workshops and seminars throughout the year.

These include:

- One-to-one coaching to equip students with skills to be successful in their educational and life journey.
- One-to-one appointments with our Academic Skills Development Adviser to help to improve students' critical thinking, writing style and assignment structure.
- Workshops and seminars covering topics such as stress management, time management, how to write well and how to write a dissertation.

Careers Advice

Personal one-to-one careers guidance is available for all our students. Our fully qualified and experienced careers guidance practitioners provide impartial advice and guidance.

Our qualified Careers Guidance Advisers support learners in their career planning and help them to make well informed decisions about their progression and future plans.

They can help with:

- Career planning and decisions
- Researching career opportunities
- Job search and application skills, including CV advice

We help students to draw an action plan of the steps they need to take to achieve their career and education goals.

View our careers website to learn more.

www.lincolncollege.ac.uk/careers

Financial Support

Certain students may be eligible for additional financial support. Some of the financial support available may include:

- Success Fund
- Disabled Student Allowance (DSA)
- Lincoln College Returner Incentive
- Scholarships
- Bursaries

For more information about our support services for Career Degree students, visit our dedicated support webpage.

www.lincolncollege.ac.uk/financial-support-career-degrees

We're committed to helping to increase the number of people entering Higher Education and ensuring that they are able to continue with their studies and achieve their best, particularly those who are statistically less likely to study at degree level.

Read our Access and Participation Plan here.

Living and Studying with us

Our Lincoln College campus sits in the heart of the beautiful, vibrant and culturally diverse City of Lincoln.

Lincoln offers a great mix of wonderful Gothic architecture, quaint cobbled streets and modern city living.

The 'Uphill' historic quarter is home to the world-famous Lincoln Cathedral and Lincoln Castle, which holds an original 1215 Magna Carta – something people travel from all over the world to see.

Cushioned with boutique shops, restaurants and traditional pubs – it's a global tourist destination.

The south of the city is packed with high street shops, great places to eat and buzzing bars, clubs, restaurants and coffee shops.

Lincoln is a green city with a relaxed ambiance. It has low crime rates and a diverse and accepting local community.

There are plenty of live-music venues and open mic sessions, a growing LGBT scene and a strong alternative culture following.

Lincoln is now the home of the international Steampunk movement and once a year the city is awash with a celebration of Sci-fi Victoriana as the Punks meet for their annual convention.

The City has excellent transport links and is just an hour from Nottingham and the East Coast.

Newark-on-Trent is a quaint market town, and with great road and rail links, you can travel to the cities of Nottingham and Lincoln in around 30 minutes.

Newark has an interesting history dating back to 1068 when Newark Castle was built. Parts of the castle still remain following its demolition by Oliver Cromwell and the castle grounds provide a pleasant public space.

Today the town offers a full range of facilities, affordable housing and a traditional community atmosphere. The town has a vibrant market three days a week and is host to a growing number of events that celebrate music including jazz and folk festivals.

View our accommodation webpage to learn more about potential accommodation options.

“The college were absolutely fabulous, and I’ve made lots of friends on the course”

Helen Proctor
BSc (Hons) Clinical Herbalism

How to Apply

First, visit our website:
www.lincolncollege.ac.uk/university-centre

All our courses are listed on our website, which provides more information about the programme as well as links to apply.

Full-Time

After carrying out initial research, visit the UCAS website to apply at:
www.ucas.com

It will ask for the UCAS Institution Code when filling the form in. Please use: **L42**

Details of the UCAS course codes can be found on the individual course pages.

We are happy to help with the application process, our team can support you with UCAS.

Part-Time

Part-time courses can be applied directly through the College via our website portal:
www.lincolncollege.ac.uk

Open Days

We know choosing a place to study a degree is a big commitment and a significant investment. We would advise students to visit any institution to take a look around and chat to tutors before applying.

See our website for our upcoming Open Day dates:
www.lincolncollege.ac.uk/events

Or call us to arrange a one-to-one campus tour, meet our students and tutors and check out our community.

Open Day Dates 25/26

Jargon Busting

Academic Year

This is the teaching year which begins in September and ends the following summer.

Validated By

The institution that awards the qualification.

Accredited By

The assessment board that fosters and monitors high quality educational and professional standards.

Mature Student

Students in education over the age of 21.

UCAS

Universities and Colleges Admissions Service (UCAS) for the UK. UCAS is the organisation that centrally administers the full-time undergraduate application process.

NSS

The National Student Survey (NSS) gathers opinions from students about their time in Higher Education, asking them to provide honest feedback on what it has been like to study on their course at their institution.

Student Loans Company

The Student Loans Company (SLC) is a non-profit making government-owned organisation that administers loans and grants to students in universities and colleges in the UK.

Maintenance Loan

The main source of financial help for students towards living costs is the Maintenance Loan. The Government provides these low interest loans. Graduates do not need to begin repayment of loans until they have reached a specific level of income.

Tuition Fee Loan

A tuition fee loan can cover the cost of the course fees charged for a Higher Education course. This loan is repayable but not until the student has finished or left their course and their income is over the repayment threshold.

Further Education (FE)

Education below the level of a university degree for people who have left school.

Higher Education (HE)

Education at a college or university where subjects are studied at an advanced level.

Foundation Degree

A two-year programme (if studied full-time) resulting in a Level 5 qualification on completion. Equal to the first two years of a three-year Bachelor's degree course, it is possible to then progress to a linked Top-Up degree course on completion, with the award of a full honours degree after a further year of study.

Top-Up Degree

Top-Up degrees are for HND or Foundation degree holders in relevant subjects to progress to a full honours degree.

Undergraduate Degree

A student undertaking a first degree, usually a BA (Bachelor of Arts) for a degree in the arts and BSc (Bachelor of Science) for a degree in the sciences. Students are referred to as graduates when they have completed their degree.

Postgraduate Degree

A qualification that is undertaken after the completion of an undergraduate degree. A postgraduate degree can take the form of a Master's (MSc) degree, a PhD or an industry-specific qualification.

Higher Technical Qualifications (HTQs)

HTQs are technical qualifications that have been developed by employers and awarding bodies so students can develop the skills that employers want.

Qualifications

Levels	Qualification	Abbreviation
Level 4	Certificate of Higher Education	CertHE
	Higher National Certificate	HNC
	Higher Technical Qualifications	HTQ
Level 5	Higher Technical Qualifications	HTQ
	Higher National Diploma	HND
	Foundation Degree	FdA, FdSc
	Diploma of Higher Education	DipHE
Level 6	Bachelor's Degree	BA, BSc
	Bachelor's Degree with Honours	BA/BSc (Hons)
	Higher Apprenticeships	HA
	Professional Graduate Diploma in Education	PGDE
Level 7	Master's Degree	MA, MSc, MBA
	Postgraduate Diploma	PGDip
	Postgraduate Certificate	PGCert
Level 8	Doctorate	PhD

UCAS Tariff

UCAS Tariff points translate qualifications and grades into a numerical value. Some universities and colleges use UCAS Tariff points in their course entry requirements, but this doesn't mean they won't consider qualifications that don't appear on the Tariff – so make sure to check the course entry requirements carefully.

For more information, the UCAS website has a handy tariff calculator that can be used to work out how many UCAS points your qualifications are worth: www.ucas.com/ucas/tariff-calculator

Apprenticeships

Duration	SCQF Credits*	Size Band	Grade	Grade Band	Tariff Points
36 months	150+	14	P	8	112
24 months	100-149	12	P	8	96
18 months	72-99	8	P	8	64
12 months	<71	6	P	8	48

*SCQF Credits apply to apprenticeships in Scotland only.

Access to University (HE)

Lincoln College's Access to University (also known as Access to Higher Education) courses are designed to support adult learners in their progression to a wide range of degrees.

Access to University courses are designed for adults who wish to progress in their careers, change direction, or pursue university-level study without the usual entry qualifications.

These programmes are particularly suited to those who have been out of education for some time and want to build confidence and experience before moving on to higher-level study.

With no upper age limit, the courses offer condensed timetables to support learners with busy lives.

Delivered in a supportive environment, the programmes are closely aligned with the requirements of higher education institutions, including Lincoln College University Centre. This helps ensure students are well-prepared with the skills and confidence needed to succeed in further academic study.

They are also the perfect stepping-stone for students needing to top up their existing qualifications or to gain the required entry requirement for their chosen degree course.

Our Access to University Course Pathways:

- Access to Business
- Access to University Health Professions, Nursing and Midwifery
- Access to University Humanities and Social Science
- Access to University Science

To find out more, visit:
www.lincolncollege.ac.uk/access-to-uni

Lincolnshire Institute of Technology (IoT)

Supporting Technical Skills Development in Lincolnshire

The Institutes of Technology (IoT) have been formed across England to enhance the career and employment chances of young people and adults.

The programmes that have been created at the institutes have been designed in collaboration with employers, colleges, and universities to ensure students are work-ready and to offer clear career progression.

At the Lincolnshire Institute of Technology, our aim is to develop the talent and skills to drive exciting new age industries and play a role in enabling a dynamic, technology-driven economy.

We have a range of Level 4, 5 and 6 courses covering six IoT pathways - Automotive Engineering, Aeronautical Engineering, Digital Technologies, Electrical and Mechanical Engineering, Construction & Civil Engineering and Health Sciences.

Purpose-built facilities at Lincoln College

A multi-million-pound investment has been made to refurbish our oldest Grade II listed building, Gibney, to house the IoT.

It has been designed to replicate the latest progressive working environments.

We have also equipped all our workshops and classrooms with the latest IT hardware, computing, electrical engineering and automotive engineering equipment.

More information on the Lincolnshire IoT, including videos of the Gibney building, can be found on our website:

www.lincolncollege.ac.uk/iot

Air and Space Institute (ASI)

Experience the future of aviation training at our £15.4m facility. To find out more simply visit: asi-newark.co.uk

Our Higher Education courses provide Level 4 (HNC) and Level 5 (HND) qualifications for potential careers in the aviation, aerospace, space and travel & tourism sectors.

Industry Standard Facilities

Students have access to cutting-edge facilities, including industry-designed simulation suites that are fully equipped to Boeing specifications, plus an Airbus A320 Neo - the latest aircraft flying through the skies of Europe and beyond – reinforcing our commitment to providing the latest cutting-edge technology in the learning environment.

Plus optional flight training*

Our Higher Education Programmes offer an optional opportunity for students to gain their UK Private Pilot Licence (PPL) or Light Aircraft Pilot Licence (LAPL), alongside their academic studies (at an additional cost). The balance of practical and theoretical skill is highly sought-after by global aviation industry employers.

*Subject to partner agreement.

Students have access to:

- + Industry standard engineering equipment and facilities
- + Latest flight simulator training devices
- + Airbus A320 aircraft for practical and simulated activities
- + Industry standard workshops, labs and VR suite
- + High performance computer rooms

Learn more on our ASI Subject Page or visit our ASI website www.asi-newark.co.uk

Aeronautical Engineering for England

The HNC Aeronautical Engineering for England (HTQ) programme is ideal for students wishing to work within the aviation industry. Students firstly study the HNC Aeronautical Engineering and then have the option to progress to the HND Level 5 course.

Designed to help students build technical knowledge and skills, our course focuses on the underlying principles of aeronautical engineering. Students have the opportunity to develop the skills to recognise and alleviate risk, create a safe and efficient operating environment, and assess vital information. With a focus on the future, students can also build transferable skills and learn about the decision making methods used by industry.

At ASI Newark, students learn from skilled lecturers who have a high level of working knowledge, based on industry experience. Their teaching is designed to enable students to gain a deep insight into the latest trends and requirements of the aerospace and aviation sector.

As part of the programme, students can choose to take an optional structured pilot training programme delivered by external partners at an additional cost that could lead to a Private Pilot Licence (PPL) - subject to partner agreement. Details will be available once enrolled on the course.

Modules may include:

- Engineering Design
- Engineering Maths
- Managing a Professional Engineering Project (Pearson set)
- Aircraft Aerodynamics
- Aircraft Electrical Power and Distribution Systems
- Airframe Mechanical Systems
- Composite Materials for Aerospace Applications
- Turbine Rotary Wing Mechanical and Flight Systems

Progression:

The HNC is a qualification which is widely recognised in its own right and is designed to provide students with the skills required for employment in a range of associated professions. On successful completion of the course, students may apply to continue at the College to study the HND Aeronautical Engineering.

Aeronautical Engineering for England

Building upon the foundation of the HNC Aeronautical Engineering for England (HTQ), our Higher Technical Qualification (HTQ) HND programme offers a structured and industry-aligned pathway for professional development.

The Pearson BTEC Higher National Diploma (HND) is at Level 5 (the same as the first and second year of a UK honours degree). It is an eight-unit qualification which involves studying two mandatory core subjects and a further six specialist subjects. The units have been selected to meet a broad range of local industry needs.

Our aeronautical engineering students will be based in our aviation and engineering classrooms, workshops and emulation zone that keep teaching and learning apace with cutting-edge innovation and discovery including the use of virtual reality technologies and a flight simulator.

As part of the programme, students can choose to take an optional structured pilot training programme delivered by external partners at an additional cost that could lead to a Private Pilot Licence (PPL) - subject to partner agreement. Details will be available once enrolled on the course.

Modules may include:

- Professional Engineering Management (Pearson-set)
- Further Mathematics
- Aircraft Flight Control Systems
- Aircraft Propulsion Principles and Technology
- Aircraft Structural Integrity
- Avionic Systems
- Aircraft Gas Turbine Engine Design and Performance
- Advanced Turbine Rotary Wing Aircraft Mechanical and Flight Systems

Progression:

HNC and HND qualifications are widely recognised in their own right and help provide students with the skills required for employment in a range of associated professions. On successful completion of the course students may top-up to degree level with our partner institution, Nottingham Trent University *subject to validation.

Space Technologies for England

The HNC Space Technologies for England (HTQ) programme is ideal for students wishing to work within the space industry. Students firstly study the HNC Space Technologies course and then have the option to progress to the HND Level 5 course.

Designed to help students build technical knowledge and skills, the course focuses on the underlying principles of space technologies. Students have the opportunity to develop their skills to recognise and alleviate risk, create a safe and efficient operating environment, and assess vital information. With a focus on the future, students can also build transferable skills and learn about the decision-making methods used by industry.

The Pearson BTEC Higher National Certificate (HNC) is at Level 4 (the same as the first year of a UK honours degree). It is an eight-unit qualification which involves studying five core mandatory subjects and a further three specialist mandatory subjects. The units have been selected to meet a broad range of local industry needs.

Our space technologies students will be based in our engineering classrooms, workshops and emulation zone that keep teaching and learning apace with cutting-edge innovation and discovery including the use of virtual reality technologies and flight simulators.

We have a strong focus on employability, and our training partners and professional connections can give students the chance to immerse themselves in the industry. Our central position allows students to have the opportunity for networking, seasonal jobs and work placements where available.

At ASI Newark, students learn from skilled lecturers who have a high level of working knowledge, based on industry experience. Their teaching is designed to enable students to gain a deep insight into the latest trends and requirements of the space sector.

As well as receiving engaging lectures and seminars, students are also supported by personal tutors, module leaders and course leaders. In addition, guest speakers often deliver sessions for students within ASI to enrich their learning. Previously we have welcomed speakers from Jet2, British Airways, EasyJet and East Midlands Airport.

Modules may include:

- Engineering Design
- Engineering Maths
- Engineering Science
- Managing a Professional Engineering Project (Pearson-set)
- Programming for Engineers
- Computer Aided Design and Manufacture (CAD/CAM)
- Space Environment and Applications
- Space Technologies and Manufacturing

Progression:

On completion of the Level 4 HNC, students could progress onto and top-up to the Level 5 HND Space Technologies or seek employment in the space industry.

Space Technologies for England

Building upon the foundation of the HNC Space Technologies for England, our Higher Technical Qualification (HTQ) HND programme offers a structured and industry-aligned pathway for professional development.

Designed to help students further build and develop their technical knowledge and skills in space technologies, this HTQ HND curriculum helps graduates possess the specific skills required by the modern space engineering sector.

The programme expands upon the principles established in the HNC, providing opportunities for specialisation and advanced technical training.

Assessment methodologies, including assignments and analytical testing, emphasise the practical application of acquired knowledge, mirroring real-world engineering scenarios.

Modules may include:

- Professional Engineering Management (Pearson-set)
- Further Mathematics
- Manufacturing Systems Engineering
- Sensors and Automation
- Research Project
- Space Communications
- Space Mission Design

Progression:

On completion of the Level 5 HND, students can progress onto university as an undergraduate or seek employment in the space industry.

Animal Management Courses

Combine your passion for animals with a qualification that could help kick-start your career in the animal industry.

Students have access to:

- + Farm Animals
- + Domestic Animals
- + Exotic Species
- + Wildlife Species
- + Hands-on Industry Based Learning

Learn more on our
Animal Subject Page

“Through the superb support of the college tutors, along with hard work and determination, I was awarded a first-class honours.

I am currently living my dream as a zookeeper, working with a range of species including primates, psittacines, and big cats.”

Chloe Paddison
BSc (Hons) Applied Animal Management (Top-Up)

Applied Animal Management

The FdSc Applied Animal Management programme is designed to reflect ongoing developments within the animal industry including the use of working animals within society, the need to protect and enhance the habitats and populations of animal species as well as the importance of enhancing animal health and welfare through the use of evidence-driven practice provided by the work of a broad range of animal manual therapists.

Competent practical animal husbandry and handling/restraint skills, within the industry as a whole, are paramount and as such the course enables students to work with a range of domestic, farm, exotic and wildlife species, within industry environments.

This provides students with valuable experience for gaining insight into the different sectors of the industry, observing differences within practice (including specialist equipment use) and networking for future volunteering and career opportunities.

Modules may include (Level 4):

- Comparative Anatomy and Physiology
- Animal Health and Disease
- Comparative Animal Nutrition
- Animal Husbandry and Collection Management
- Animal Behaviour and Welfare
- Study Skills and Biological Principles

Modules may include (Level 5):

- Evolution and Ecology
- Animals in Society
- Animal Cognition and Training
- Wildlife Management, Rescue and Rehabilitation
- Introduction to Animal Physical Therapies
- Research Methods and Project

Progression:

On successful completion of this course, students may progress on to the Applied Animal Management Top-Up degree at Lincoln College.

Applied Animal Management (Top-Up)

The BSc (Hons) Applied Animal Management (Top-Up) degree programme is designed to reflect ongoing developments within the animal industry including the use of working animals within society, the need to protect and enhance the habitats and populations of animal species as well as the importance of enhancing animal health and welfare through the use of evidence-driven practice provided by the work of a broad range of animal care practitioners.

The programme is designed to enable students who have already completed a sub-degree (eg. HND or Foundation Degree) within this subject area to continue their studies on to Honours Degree level.

Alongside theory, student learning is enhanced by practical observations and discussions with a range of local practitioners.

Modules may include:

- Animal Conservation and Breeding
- Modalities of Animal Therapy
- Animal Assisted Interventions
- Current Issues in Animal Sciences
- Dissertation

Progression:

On successful completion of this course, graduates may progress to employment or postgraduate study at an alternative institution.

Complementary Medicine Courses

Medicines Subject Page or visit our School of
Complementary Medicine website
www.complementarymedicines.co.uk

“I would encourage anyone interested in natural medicine to join the course. You get a wealth of experience with patients, and it’s a rewarding experience.”

Giuseppe Di Carlo
BSc (Hons) Clinical Herbalism

Clinical Herbalism

The BSc (Hons) Clinical Herbalism degree programme provides a comprehensive education and training in the principles and practice of clinical herbalism.

This incorporates the 'energetic' understanding of the cause of illness and the therapeutic actions of medicinal plants as well as the orthodox disciplines of Anatomy, Physiology, Pathophysiology and Nutrition. It is integrative in approach, linking traditional herbal medicine with modern science and holism.

Our teaching methods include a rich mixture of theoretical study, reflection, the use of intuition and practical experience including professional practice in our on-site Complementary Medicine Clinic.

The course is delivered by block learning, which means that the attendance requirements for the academic modules are met through eight full three-day weekends per year, plus attendance at the Complementary Medicine Clinic for clinical training.

Year One of the course requires 90 hours of clinical training, (typically achieved during term time, either one day per fortnight or in blocks).

Year Two requires 190 hours and Year Three requires 220 hours (roughly one day per week or the equivalent). There are a variety of ways in which this attendance can be achieved.

The course is accredited by the EHTPA (the European Herbal and Traditional Practitioners Association)

and NIMH (the National Institute of Medical Herbalists). Graduates are eligible to become members of NIMH and CPP (College of Practitioners of Phytotherapy) or URHP (Unified Register of Herbal Practitioners).

Modules may include:

- Business Skills
- Clinical Practice
- Anatomy and Physiology for Herbal Medicine
- Pharmacy and Community Practice
- History, Philosophy and Evidence
- Herbal Therapeutics
- Nutrition as Therapy
- Pathophysiology
- Research Methods
- Clinical Skills for Herbalists
- Research Project

Progression:

The successful completion of BSc (Hons) Clinical Herbalism provides graduates with the qualifications that may enable them to set up in professional practice as an herbal medicine practitioner. There may also be broader employment opportunities in the health and manufacturing industries and opportunities to progress to postgraduate study.

Complementary Studies (Herbalism)

The CertHE Complementary Studies (Herbalism) programme provides a comprehensive foundation education and training in the principles and practice of clinical herbalism.

This incorporates the 'energetic' understanding of the cause of illness and the therapeutic actions of medicinal plants as well as the orthodox disciplines of Anatomy and Physiology.

It is integrative in approach, linking traditional herbal medicine with modern science and holism.

Our teaching methods include a rich mixture of theoretical study, reflection, the use of intuition and practical experience including professional practice in our on-site Complementary Medicine Clinic.

Our aim is to enable students to progress to the full degree to become a competent and confident practitioner of clinical herbalism.

The course is delivered by block learning, which means that the attendance requirements for the academic modules are met through eight full three-day weekends plus attendance at the Complementary Medicine Clinic for clinical training.

The course requires 90 hours of clinical training, (typically achieved during term time, either one day per fortnight or in blocks).

Modules may include:

- Clinical Practice 1
- Anatomy and Physiology for Herbal Medicine
- Herbal Therapeutics 1
- Pharmacy and Community Practice
- History, Philosophy and Evidence

Progression:

Successful completion of this Level 4 programme provides a natural progression to the BSc (Hons) Clinical Herbalism degree.

Lincoln College University Centre is approved by The Open University as an appropriate organisation to offer higher education programmes leading to Open University validated awards.

Complementary Healthcare and Wellbeing

The DipHE Complementary Healthcare and Wellbeing programme aims to provide learners wishing to undertake studies within complementary therapies with a deeper, broader, and enriched learning experience - supporting career development into this ever-growing and expanding industry.

This course incorporates and links to the current healthcare and wellbeing initiatives, along with the growing developments and changes within the healthcare sector, NHS needs and patient choice whilst ensuring the skills, techniques and essential knowledge allow for both private and public sector career opportunities.

Modules may include:

- Principles and Practices of Complementary Therapies
- Anatomy, Physiology and Pathology
- Interpersonal Skills and Professional Ethics
- Clinical Practice
- Integrated Healthcare and Wellbeing Development
- Fundamental Research and Study Skills
- Business and Marketing
- Advanced Clinical Practice
- Complementary Therapies in Specialist Settings
- Research Project

- Nutrition as Therapy
- Herbal Therapeutics

Assessments may include a combination of strategies from essays, written exams and practical formative and summative assessment. There may also be a requirement to collate a clinical portfolio made up of reflective practice, case study reports and formative assessment feedback that will support professional progression, ensuring that students cover a wide range of client objectives, types, and techniques.

The course is accredited by the Complementary Health Professionals and students are eligible to get free CHP membership.

Progression:

Graduates may progress on to a BSc degree course or into employment within healthcare settings, the NHS, within specialist areas such as palliative care, midwifery, integrated healthcare practices and private clinics.

Construction and Engineering Courses

Studying either engineering or construction can lead to a rewarding career.

Robert Woolley
HNC Electrical and Electronic Engineering for England

“I have just started a new job at Dunlop Oil & Marine Ltd and this HNC was a big part of that happening”

We also offer courses specific to Aeronautical Engineering. For more details go to pages 36-39.

Learn more on our Construction and Civil Engineering Subject Page

Learn more on our Electrical and Mechanical Subject Page

Civil Engineering

The HNC Civil Engineering programme is a vocational qualification designed to offer students practical experience in the typical tasks and requirements of engineering professionals and the underpinning academic knowledge.

Through both practical and theoretical sessions, students have the opportunity to develop the hands-on skills that are essential for successful employment within the sector.

Assignments are vocational in nature and students are encouraged to apply their knowledge in the most relevant way to their current employment or aspirational job role. A number of off-site visits can be undertaken throughout the course to support the theoretical principles and practices delivered.

Modules may include:

- Construction Design Project
- The Construction Environment
- Science and Materials
- Mathematics for Construction
- Civil Engineering Technology
- Principles of Structural Design
- Surveying, Measuring and Setting-out
- Geotechnics and Soil Mechanics

Progression:

The HNC is a qualification which is widely recognised in its own right and is designed to provide students with the required skills for employment in a range of associated professions. On successful completion of the course students may apply to continue at the College to study the HND in Civil Engineering.

Civil Engineering

The HND Civil Engineering is available as a two-year part-time Level 5 programme designed for students who have experience of, or work in, the civil engineering industry and have ambitions of working in this area from a professional, managerial, or technical capacity.

The course builds on the knowledge and skills studied in the HNC and covers subjects such as: Principles of Structural Design, Civil Engineering Technology, mathematics for construction, structural design, and project.

This course is designed to complement a student's ability to find solutions to engineering problems using developed technology and apply skills to a broad range of industrial areas, such as design, development, manufacturing, testing, maintenance and operation of electrical or electronic equipment.

Students have the opportunity to gain contemporary vocational skills including study, research, analysis, planning and organisational skills, as well as the responsibility for their own learning, ability to be flexible and to work co-operatively with others.

Modules may include:

- Construction Design Project (Pearson-set)
- Science and Materials
- The Construction Environment
- Mathematics for Construction
- Civil Engineering Technology
- Principles of Structural Design
- Construction Technology
- Surveying, Measuring and Setting-out

Progression:

HND qualifications are widely recognised in their own right and provide students with the skills required for employment in a range of associated professions. On successful completion of the course students may top up to degree level at an alternative institution.

Construction Management for England (Construction Design and Build Technician)

The HNC Construction Management for England (Construction Design and Build Technician) (HTQ) programme is a vocational qualification designed to offer students practical experience in the typical tasks and requirements of construction professionals and the underpinning academic knowledge.

Students have the opportunity to gain a wide range of construction knowledge linked to practical skills gained through research, independent study, directed study and workplace scenarios.

Students are involved in vocational activities that help them to develop behaviours (attitudes and approaches) and transferable skills. Transferable skills are those such as communication, teamwork, research and analysis, which are highly valued in Higher Education and in the workplace.

This course is a Higher Technical Qualification (HTQ). HTQs are technical qualifications that have been developed by employers and awarding bodies so students can develop the skills that employers want.

Modules may include:

- Construction Design Project
- The Construction Environment
- Construction Technology
- Legal and Statutory Requirements in Construction
- Digital Applications for Construction Information
- Financial Management and Business Practices in Construction
- Tender and Procurement
- Building Information Modelling

Progression:

The HNC is a qualification which is widely recognised in its own right and is designed to provide students with the skills required for employment in a range of associated professions. Electrical and Electronic Engineering for England

This nationally recognised qualification is suitable for those currently working in the electrical/electronic engineering profession or those seeking employment.

Highly regarded by local employers, this vocational qualification can offer students practical experience in the typical business tasks and requirements of engineering professionals and the underpinning academic knowledge.

Students 'learn by doing' which helps to maintain our high success rate for student employability, and can complement their ability to find solutions to a range of engineering problems using developed technology.

This means that students can apply their skills to a broad range of industrial areas, such as design, development, manufacturing, testing, maintenance and operation of electrical or electronic equipment.

Modules may include:

- Professional Engineering Management
- Further Mathematics
- Further Programmable Logic Controllers (PLCs)
- Industrial Power, Electronics and Storage
- Embedded Systems
- Further Electrical, Electronic and Digital Principles
- Utilisation of Electrical Power

Progression:

HNC and HND qualifications are widely recognised in their own right and provide students with the skills required for employment in a range of associated professions. On successful completion of the course students could top up to degree level at an alternative institution.

Mechanical Engineering for England

The HNC Mechanical Engineering for England (HTQ) programme is ideal for students wishing to work within the engineering industry.

The HNC is an eight unit qualification which involves studying three mandatory core subjects and a further five specialist subjects.

The units have been chosen to meet a broad range of local industry needs following close consultation with employers.

The course provides relevant industry related training for those who wish to pursue a career in the engineering sector.

Assessments are mainly by assignment with some testing in the analytical subjects.

This course is a Higher Technical Qualification (HTQ). HTQs are technical qualifications that have been developed by employers and awarding bodies so students can develop the skills that employers want.

Modules may include:

- Engineering Design
- Engineering Maths
- Fluid Mechanics
- Managing a Professional Engineering Project
- Fundamentals of Thermodynamics and Heat Engines
- Mechanical Principles
- Quality and Process Improvement
- Production Engineering for Manufacture

Progression:

The HNC is a qualification which is widely recognised in its own right and is designed to provide students with the opportunity to develop the skills required for employment in a range of associated professions. On successful completion of the course students may continue at the College and study the HND Mechanical Engineering for England. Mechanical Engineering for England

Building upon the foundation of the HNC Mechanical Engineering for England, our Higher Technical Qualification (HTQ) HND programme offers a structured and industry-aligned pathway for professional development.

This HND facilitates a seamless transition for those seeking to enhance their core engineering competencies.

Designed in partnership with employers, this HTQ HND curriculum helps graduates possess the specific skills required by the modern engineering sector.

The programme expands upon the principles established in the HNC, providing opportunities for specialisation and advanced technical training.

Assessment methodologies, including assignments and analytical testing, emphasise the practical application of acquired knowledge, mirroring real-world engineering scenarios.

This qualification enhances employability and helps prepare graduates for advanced roles within mechanical engineering, with a specific focus on meeting the needs of regional industries. The programme delivers a comprehensive and industry-relevant qualification, enabling individuals to advance their careers with confidence and expertise.

This course is a Higher Technical Qualification (HTQ). HTQs are technical qualifications that have been developed by employers and awarding bodies so students can develop the skills that employers want.

Modules may include:

- Professional Engineering Management
- Further Mathematics
- Advanced Mechanical Principles
- Virtual Engineering
- Further Thermodynamics
- Manufacturing Systems Engineering
- Lean Manufacturing
- Thermofluids

Progression:

HNC and HND qualifications are widely recognised in their own right and provide students with the skills required for employment in a range of associated professions. On successful completion of the course students can top up to degree level at another higher institution.

Digital Technologies Courses

With an ever-evolving industry, our courses are designed to help students gain the knowledge and skills required to enhance their career potential.

Students have access to:

- + Industry standard software development platforms
- + Dedicated computer networking equipment
- + High-performance dedicated computer labs
- + Modern 3D printing facilities

“I had offers from a few other universities but the staff and the quality of learning I would get by having the smaller group sizes at Lincoln College appealed more to me.”

Thomas Hughes
BSc (Hons) Computer Science

Learn more on our Digital Technologies Subject Page

Computer Science

The BSc (Hons) in Computer Science provides learners with a gateway to employment within the computing industry. It is aimed at providing the fundamental skills for a broad range of roles.

This qualification is designed to equip students with the knowledge, understanding and skills required to enhance their career potential in the computing and IT profession. The course is aimed mainly, but not exclusively, at those who have some computing experience.

Modules may include:

- Computer Systems
- Introduction to Programming
- Programming and Software Quality Assurance
- Maths for Computing
- Web Development Fundamentals
- Responsive Web Development
- Object Oriented Programming
- Server-Side Development
- Database Principles and Technologies
- Network Systems
- HCI and User Interface Design
- Group Project
- Computing Project (Dissertation)
- Mobile Application Development
- Artificial Intelligence
- Cloud Computing
- Employability and Entrepreneurship

Progression:

On successful completion of this course, graduates may pursue a career within the computing and IT industry. Our aim is to provide graduates with the capability to adapt and respond to the changing and diverse nature of the sector. Graduates could also complete postgraduate courses at an alternative institution or pursue a teacher training qualification.

Digital Learning Design

The CertHE Digital Learning Design programme offers students the opportunity to learn and create engaging and effective online and blended delivery courses for use in schools, Further and Higher Education sectors, within businesses, training organisations and by individual content authors.

The programme contains modules of study providing discrete digital and planning skills that, when combined with the course project, allow the creation of a fully formed digital course.

Assessment activities focus on producing tangible outputs that can be of significant practical value in real world education and training situations.

Modules may include:

- Digital Authoring
- 21st Century Learning Design Principles
- Principles of Online Pedagogy
- Project

Coursework and project-style tasks may make up a large proportion of the assessments. Assessment tasks and learning outcomes will also be mapped to evidence the progression from one module to the next, enabling students to track their own progress and development.

Progression:

Completion of this Level 4 course will naturally complement and support a teacher's further professional and academic development. Alongside opening opportunities to pursue professional specialisations within the field of digital learning design, the practical and theoretical skills that students have the opportunity to develop during this course will amply support them in any further Level 5 or above qualifications in education and teaching.

Digital Innovation and Development

The CertHE Digital Innovation and Development programme is the ideal introduction to the complex and exciting world of online, mobile and virtual reality development.

This course equips post-Further Education learners, as well as current software developers, electronics engineers, and digital media professionals, with essential skills needed to work in industries that merge software, web, mobile, and virtual reality technologies. It focuses on developing innovative, interactive solutions across a variety of sectors and applications.

Designed as a pathway into the computing industry, the course offers a strong foundation for a wide range of roles by delivering core technical and creative skills.

Modules may include:

- Web Development Fundamentals
- Introduction to Programming
- HCI and User Interface Design
- Networking and Software Security
- VR Development Principles
- Responsive Web Development

Progression:

On successful completion of the course, graduates may pursue careers in a variety of areas including software development, development of technological solutions and the network infrastructure.

Digital Innovation and Development

The DipHE Digital Innovation and Development programme provides learners with a gateway to employment within the computing industry; it is aimed at providing the fundamental skills for a broad range of roles in the dynamic and fast-evolving field of online, mobile and virtual reality development.

It provides post-Further Education learners and existing software developers, electronics engineers and electronic media developers with the fundamental skills to work in industries that combine software, web, mobile and virtual reality skills to develop new and innovative interactive solutions for a wide range of industries and applications.

The course is designed to take a learner with limited experience in the field of computing to being skilled in the techniques required for them to work in the areas of virtual reality, augmented reality and mobile applications development industries.

Modules may include:

- Web Development Fundamentals
- Introduction to Programming
- HCI and User Interface Design
- Networking and Software Security
- VR Development Principles
- Responsive Web Development
- Advanced VR Development
- Server-Side Web Development
- Database Principles and Technologies
- Mobile Applications Development
- Mobile and AR Development
- Digital Solutions Project

Progression:

Successfully completing the Diploma could open opportunities in a broad range of professions that need specialists in mobile, web and virtual technologies alongside the traditional career paths of Mobile Applications Developer, Web Developer, Software Engineer, Games Developer and Virtual Reality Developer.

Photography Courses

Looking to develop your technical and visual skills?

This course is an excellent introduction into the world of creative commercial photographic practice.

Students have access to:

- + Darkroom
- + Photography Suite

- + CHT Common Room
- + Condensed Timetable

Learn more on our Photography
Subject Page

Commercial Photography with Digital Media

The BA (Hons) Commercial Photography and Digital Media degree programme emphasises the creative use of photography and other lens-based media across a wide range of subject areas and applications.

The course encourages the exploration of contemporary practice and includes critical and contextual modules. Traditional techniques and practices are investigated alongside digital practice and output.

This is a visual communication course structured to provide a route into employment in creative media, photography and associated industries. Individual project briefs are designed to enable learners to achieve their full potential using technical and critical skills relevant to their specific pathways.

The BA helps prepare learners for a career in the creative industry, through the development of creative skills, technical and professional expertise.

Modules may include:

- Historical and Contextual Studies
- Brand Identity and Design
- Digital Workshop Practice
- Fashion Photography
- Advertising Imaging and Output
- Final Major Project

Progression:

Graduates from this programme could enter into a wide range of careers within the creative industries including roles such as film making and production, TV broadcasting and freelance photography. Graduates may also progress to further study at postgraduate level.

Professional Policing

The BA (Hons) Professional Policing degree programme is designed to prepare students for the fast-moving world of policing by following a curriculum written and licensed by the College of Policing.

Studying on our BA (Hons) Professional Policing programme allows learners the opportunity to study a wide range of theoretical and legislative subjects and gain the knowledge required for a rewarding career in the police service.

Modules may include (Year 1):

- Understanding The Police Constable Role
- Policing Communities
- Research Methods and Academic Skills for Policing
- Police Procedure and Evidence
- Criminal Justice
- Criminology and Crime Prevention

Modules may include (Year 2):

- Criminal Investigation
- Information and Intelligence
- Policing the Roads
- Police Response and Major Incidents
- Police Accountability, Decision-making and Discretion
- Police Problem-solving Models and Theories

Modules may include (Year 3):

- Policing Abuse and Public Protection
- Research Project (Dissertation)
- Serious and Organised Crime
- Policing Mental Health, Vulnerability and Risk
- Murder: Dynamics, Pathologies and Investigation*

*Optional module - further options may be available.

Progression:

The programme aims for graduates to be equipped with an in-depth understanding of the role of a police officer today, including a thorough grasp of criminal justice systems and the powers and laws used by the police throughout England and Wales. Graduates may progress to careers in policing. Please note that completion of this degree does not guarantee employment as a police officer or police staff.

Social Science: Criminology and Law

The BA (Hons) Social Science: Criminology and Law degree programme incorporates multi-disciplinary theoretical explanations of crime and deviance to key issues and aspects of the criminal justice system, support agencies and networks.

Students have the opportunity to consider practical scenarios in a variety of aspects of the Criminal Justice System (CJS), such as public perception of communities on crime.

This provides students with the theoretical knowledge to develop their critical thinking and problem-solving skills in crime prevention and how these are applied in society and in practical criminal justice settings.

Students' learning is enhanced by strong links to local employers and application of their theoretical knowledge to researching employment choices and ideas in the criminal justice system and other social science related careers.

Modules may include:

- Introduction to Psychology
- Study Skills
- Introduction to Law and Criminal Justice
- Key Concepts in Social Research
- Introduction to Criminological Theory
- Social Policy

Progression:

Graduates will have the opportunity to develop a strong set of practical skills for pursuing careers in a range of sectors. For example, Prison and Probation Services, Local Government, the police and agents of the CJS. After successful completion of the BA (Hons) Social Science: Criminology and Law students may progress to postgraduate study, research or employment.

Subject Landing Page

Sports Coaching, Education and Development

The FdSc Sports Coaching, Education and Development programme aims to develop students' practical skills that are essential for the industry, whilst simultaneously expanding their academic knowledge and understanding of key theoretical concepts.

A distinctive feature of this Foundation Degree is providing students with authentic and innovative work-based learning opportunities.

Working in real-life environments is crucial in providing students with the work-ready skills needed to succeed within the sports coaching, sports development, and education sector.

Alongside the vocational elements of the programme, students also study a range of underpinning theories that facilitate their development.

Modules may include (Year 1):

- Research and Study Skills for HE
- What is Research?
- Fundamentals of Sports Coaching
- Sports Coaching and PE Experience 1
- Understanding Learning for Teaching and Coaching
- Teaching and Learning: Theory to Practice
- School Sport and PE: Primary Education
- Sport Development Principles

Modules may include (Year 2):

- Research Project
- Developing Physical Literacy in Young People
- Sports Coaching and PE Experience 2
- An Introduction to the Classroom
- Teaching in the Digital World
- School Sport and PE: Secondary Education
- Contemporary Issues in Sport

Progression:

Many of the students who choose to study this course are seeking careers within the sports coaching, sports development, or education sector. This Foundation Degree qualification is a Level 5 qualification in its own right that can lead students directly to employment but is often seen as a step towards attaining a full BSc (Hons) degree, with most students continuing on to the BSc (Hons) Sports Coaching, Education and Development (Top-Up) degree delivered here at Lincoln College.

Sports Coaching, Education and Development (Top-Up)

The BSc (Hons) Sports Coaching, Education and Development (Top-Up) programme aims to develop students' knowledge and skills in the domains of sports coaching, sports development and education - enabling graduates to be capable of operating in a wide range of coaching and education environments, utilising critical reflection skills to ensure continuous development within their practice.

The programme is designed to enable students who have already completed a sub-degree (HND or Foundation Degree) within this subject area to continue their studies on to Honours Degree level.

Modules may include:

- Research Proposal
- Dissertation
- Sports Coaching Behaviours
- Sports Development in the Community
- Teaching in the Physical Classroom

Progression:

The course is designed to prepare and aid learners for a career in the sports coaching, education and sports development industries. Graduates may be eligible to continue to postgraduate level in a related field or to further their teaching ambitions by pursuing a teacher training qualification.

Did you know that we also offer Higher Apprenticeships and Higher Level Skills courses?

Higher Apprenticeship

An apprenticeship is a job with training. Students spend most of their time doing on-the-job training, and the rest studying at college.

How do higher apprenticeships work?

Level 4 apprenticeships are equivalent to the first year of an undergraduate degree, or a Higher National Certificate (HNC).

Level 5 apprenticeships are equivalent to a foundation degree, or a Higher National Diploma (HND).

If students want to gain further qualifications, they can go on to complete a degree apprenticeship – the equivalent to an undergraduate or master's degree.

An apprenticeship is like a job, but with an added element of study.

Students spend most of their time doing on-the-job training, and the rest studying at college.

At the end of the apprenticeship, there is an assessment to check that students can confidently perform their role.

If they pass, they are awarded their apprenticeship. The assessment is nothing to worry about – they will have been building up to it throughout their time on the apprenticeship.

A Higher Apprenticeship could be exactly what a student needs to begin the career of their dreams.

To find out more, scan the QR code or visit: www.lincolncollege.ac.uk/higher-apprenticeships

Higher Level Skills Courses

Lincoln College University Centre's Higher Level Skills Courses offer students the chance to build on their existing qualifications with additional industry recognised qualifications and certificates.

We've designed our Higher Level Skills Courses to help upskill graduates in their chosen sector or industry by supporting the development of both academic knowledge and vocational skills.

Our classes are smaller which means our students can receive more one-to-one time with their tutors, as well as engaging debates and collaborative working with fellow students.

With our condensed timetables, students may choose to work while studying, look after family or enjoy a better study-life balance.

We offer Level 4 and Level 5 qualifications in accounting, automotive electric/hybrid vehicles, education and training, people management and more.

To find out more, scan the QR code or visit: www.lincolncollege.ac.uk/higher-level-skills
